1.	Regarding EGMS project, here are few additional questions we have:	<b>Prospective bidders are advised as follows: -</b>
	i) What is the estimated total number of tax stamps required in Kenya?	The estimated number of secure marks is about 3 billion annually. However, the number may vary depending on production patterns, the quantities of products imported into Kenya or a change in law necessitating inclusion of additional products in the System
	ii) How many of these tax stamps will be printed as digital tax stamps?	KRA is open to consider different types of secure marks and solutions available and as such no differentiation has been defined.
	iii) Can you share with us an image of the current digital tax stamp used?	The image for the current digital stamp is provided below. It is however important to note that KRA may review the stamp format/security features from time to time as may be necessary and the system should be able to facilitate that.
