	<p>15. Power capacity \leq 24kVA" For the HE mobile system</p> <ul style="list-style-type: none"> • What is meant by Power capacity \leq24kVA ? • Is using a 27Kva rated 400 VAC diesel generator that provides power to the x-ray system (400VAC, 3 Phase, 63A (TN-S 3-Phases, Neutral, Earth), 50Hz) an acceptable solution ? 	Refer and respond as per KRA's minimum technical specifications
CARGO SCANNERS		
The Lessor should meet/submit the following:	Bidder clarification questions	KRA's Response (Clarification / Addendum)
1. "Low energy and high energy x-ray transmission, 3Mev and 6Mev respectively." – This requirement applies for: drive through scanner , drive through scanner out gauge cargo, HE mobile scanner and Fixed gantry scanner.	Is it acceptable to provide a system with low energy and high energy transmission of 4 Mev and 6 Mev respectively?	The stated energy level is a minimum requirement hence 6MeV and 9 MeV are admissible. Must meet DUAL ENERGY requirement.

<p>1.1 Throughput - The scanner shall be able to scan at least 150 trucks per hour</p>	<p>Drive through scanners through put requirement is 150 trucks per hour , can we get them to get this down to a more realistic number like 100 / hour ?</p>	<p>Refer and respond as per KRA's minimum technical specifications</p>
<p>3. "The scanner must be integratable with the KRA iScan system for centralized image storage in the KRA data centres and centralized image analysis from the KRA scanner command centres. The scanner shall be integrated with KRA iScan system at the supplier's own cost."</p>	<p>Can the customer provide information or documentation on the iScan system and the data format that is supported in iscan ?</p> <p>Can the customer specify the data fields that he would like to bring over form the x-ray scanner to iScan ?</p>	<p>Bidders who are not original iScan solution installers must provide written evidence of the existence of a negotiated arrangement with the original iScan service provider for support in system integration and subsequent maintenance for the duration of their equipment's life. The cost of such system integration and maintenance support should be included in the bid price.</p>
	<p>iScan – can you please identify the original service provider of iScan? This company isn't identified in the RFP, which is a requirement to have an agreement with this company. Our equipment and services are more than capable of integrating and sharing information to iScan, but without sharing this information the RFP eliminates all potential bidders automatically. Your guidance and clarification is much appreciated.</p>	<p>Bidders are required to provide a integration confirmation from iscan service providers who can be reached through the following email address e-mail; maxiongfeng@nuctech.com and Copy; eprocurement@kra.go.ke</p>
<p>4. "Radiation protection area : 41m(L)×31m(W) (For 18m scanning length) Dose rate on the system boundary - < 2.5 μSv/h" - HE mobile scanner</p>	<ul style="list-style-type: none"> • Can the customer confirm that 2.5 uSv/h is cumulative dose ? 	<p>Tender requirement prevails This is not a cumulative dose. It is a dose rate. This is a dose rate</p>

ISO 9001:2015 CERTIFIED

<p>5. Public annual effective dose < 0.2mSv” – HE mobile scanner and Fixed gantry scanner</p>	<p>1. ICRP/NCRP international standards recommended limit for the “general public and minors” at the controlled zone allowing 100% occupancy for 2000 hr/yr (40hr/wk, 50wk/yr) with an accumulated annual dose to be less than 1.0 mSv/yr. Is the customer requirement of 0.2mSv assuming 20% occupancy factor $0.2 \times 1\text{mSv} = 0.2\text{mSv}$?</p> <p>2. Can this be based on ICRP/NCRP standards ?</p>	<p>Tender requirement prevails. This is KRA's internal standard and it is based on 100% occupancy</p>
	<p>One more item which looks like a typo for all cargo x-ray systems requirement lists : “8. Spatial resolution : $\leq 2\text{mm}$ steel wire in air ” this should be wire resolution.</p>	<p>Refer to addendum set 2 issued on 12.07.2019</p>
